

1 – Download an authentication app to your smartphone

- Microsoft Authenticator ([Android](#) or [iOS](#))

- Aegis ([Android](#))

2 -

Next, log in to your account and go to this page:

<https://aka.ms/MFASetup>

3 - Then link your account to your app:

Add a sign-in method

Passkey in Microsoft Authenticator

Sign in with your face, fingerprint, PIN

Security key

Sign in using a USB, Bluetooth, or NFC device

Microsoft Authenticator

Approve sign-in requests or use one-time codes

Hardware token

Sign in with a code from a hardware token

Alternate phone

Get a call to sign in with a code

Office phone

Get a call to sign in with a code

App password

Use this to sign in to a specific app that requires a password

Depending on whether you want to use Microsoft Authenticator or another app, click “Next” (Microsoft Authenticator) or “I want to use a different authenticator app” (Aegis):

Click Next

Scan the QR code, then click “Next”:

or hardware token - code [Change](#)

Authenticator app

Scan the QR code

Use the authenticator app to scan the QR code. This will connect your authenticator app with your account.

After you scan the QR code, choose “Next”.
